

RESPONSE AS A AMENDMENT

Here are some amendments under the (topic) heading 'Abstract of the Disclosure' of the original invention document this is what I am amending:

- a. In sentence #1 of the original document I am amending the words/phrase: (There are), (pertaining to my), (of the), (that are different from other baby beds that are presently out on the market), by deletion, and adding the word (offers) in sentence #1 of the new amended document, in order to delete any extensive amount of word usage without changing or adding to this invention.
- b. In sentence #2 and #3 of the original invention there are a few amendments that I am amending and those are: sentence #2 (The 'Twinus De La Beddas) replaced with (This invention) of the new amended document of it's sentence #2, also (regular), (linked), (by way of 4 of the lamp pole's large extending vinyl/plastic arms (2 on each side of the pole)), (headboard), (wood) are deleted, and in the original sentence #3 are further deletions such as; (at various angles), having all deletions in the original document done so to reduce further word/ phrase usage and maintaining the subject matter originality without having any new idea additions or changes made to the invention.
- c. In sentence #4 of the invention original document there have been a few deletions I am amending for the sake of decreasing word usage and those are: (itself has it's own decorative), (which is raised), (on the lamp pole, the attached), (the, lamp pole that en-
houses), (door for child safety proof and the lamp's), (at it's sides for the lamp mobile,
yet stable locomotion), and in sentence #3 of the new document the word (features)

has been added and the word (panel) has replaced the word door of the original document and these changes have been made without deviating or adding to the original idea in this subject matter of this invention.

- d. In sentence #5 of this original invention document the entire sentence has been deleted from the new amended document in order to down size on the word usage of this topic 150 word closure and this original #5 sentence states: (The lamp (pole) connecting both twin beds makes this invention one massive unit), this sentence was also deleted because it has already been shortly but explicitly defined in the newly amended sentence #2, even so there haven't been any new ideas or new changes made to topic.
- e. In sentence #6 of the original document and sentence #4 of the new document of this invention are the same and there are no changes made.
- f. In sentences #7, #8, #9, #10 and #11 of the original document of the invention 'Twinus De La Beddas', there are several deleted words and phrases that I am amending for the purpose of down sizing the word/phrase usage of the topic and those are: sentence #7 (new), (this allows the upper bed rail mainframe to overlap the lower bedrail mainframe on one side of each bed and this is accomplished by the beds), sentence #8 (TWINUS DE LA BEDDAS'), (art features), (it's under-bed compartments, such as, it's many selections of occupiable spaced), (that can be used to store many items, it's exquisite), (that's used for temporary storing and regulating cool and warm temperatures inside it's cubicals from 6-12 hours of baby bottled milk/juices and parrishable food items), sentence #9 (The last major new art disclosure of this invention is the 15"-17" inch), (that also has an plexy pliable (teflon) plastic or vinyl Screen Covering that

has small Roller Wheels for it's moveable apprehension and a Latchet Lock attached, for the LCD Screen protection and for child safety proof), sentence #10 (All of these previously mention items are encased into a snug wood frame and it's (close) outter engrooved wood (hollow spaced) rail track, which allows the roller wheels to roll back and forth in it's engrooved wood rail track), sentence #11 (The LCD (upper/mid foot-board) encased wood frame, the screen covering, and other previously mentioned LCD, Latchet Lock, Roller Wheel), (are located and made in both of the beds upper (mid-section) footboard mainframe structure, for the LCD Viewing Monitor holding and protection preservation purposes), and lastly in sentence #5 of the newly amended document the word (forms) was exchanged for the word (features) in the original sentence #8 and sentence #6 of the new amended document, which states: (Children whom occupy these beds will experience enjoyment, enhancement, comfort, and protection), was added in place of the phrases in the original document sentences #8, #9 and #11, these additions or rearrangements of word texture was done to shorten the new version and for the new sentences to flow and sound better, without changing or adding any new ideas to this subject matter of this particular invention.
